

GeovaX DATASET URLS

=====

Catalogue source: `data_acquisition/sources.py`

Runtime policy: production pipeline uses real downloaded or live-fetched data only.

Proxy entries below are real external datasets, not synthetic data.

CADASTRAL AND ADMINISTRATIVE DATA

`tngis_cadastre`

https://github.com/ramSeraph/indian_cadastrals/releases/download/tamil-nadu/TNGIS_TN_Cadastrals.geojsonl.7z

`ncscm_cadastre`

https://github.com/ramSeraph/indian_cadastrals/releases/download/tamil-nadu/NCSCM_TN_Cadastrals.geojsonl.7z

`lgd_india`

https://github.com/ramSeraph/indian_admin_boundaries/releases/download/villages/LGD_Villages.geojsonl.7z

`gcc_wards`

<https://raw.githubusercontent.com/yashveeeeeer/india-geodata/main/data/urban/municipal-boundaries/chennai/Wards.geojson>

`gcc_zones`

<https://raw.githubusercontent.com/yashveeeeeer/india-geodata/main/data/urban/municipal-boundaries/chennai/Zones.geojson>

`cma_boundary`

<https://raw.githubusercontent.com/yashveeeeeer/india-geodata/main/data/urban/municipal-boundaries/chennai/CMA.geojson>

`gcc_opencity_wards`

<https://data.opencity.in/dataset/gcc-ward-information>

`tn_ogd_panchayats`

<https://tn.data.gov.in/catalog/details/blocks-habitations-and-village-panchayats-tamil-nadu>

BUILDING DATA

`gcc_buildings`

https://github.com/ramSeraph/indian_buildings/releases/download/urban/TNGIS_GCC_Chennai_Buildings.geojsonl.7z

`amrut_buildings`

https://github.com/ramSeraph/indian_buildings/releases/download/urban/TN_AMRUT_Buildings.geojsonl.7z

`google_open_buildings`

https://storage.googleapis.com/open-buildings-data/v3/polygons_s2_level_4_gzip/3a5_buildings.csv.gz

ms_building_footprints_tn

<https://minedbuildings.z5.web.core.windows.net/global-buildings/2026-02-03/global-buildings.geojsonl/RegionName=India/quadkey=123312203/part-00159-4feead82-d499-422b-94cb-c036c212127a.c000.csv.gz>

osm_buildings_gt
